

Activities-Tracker Module

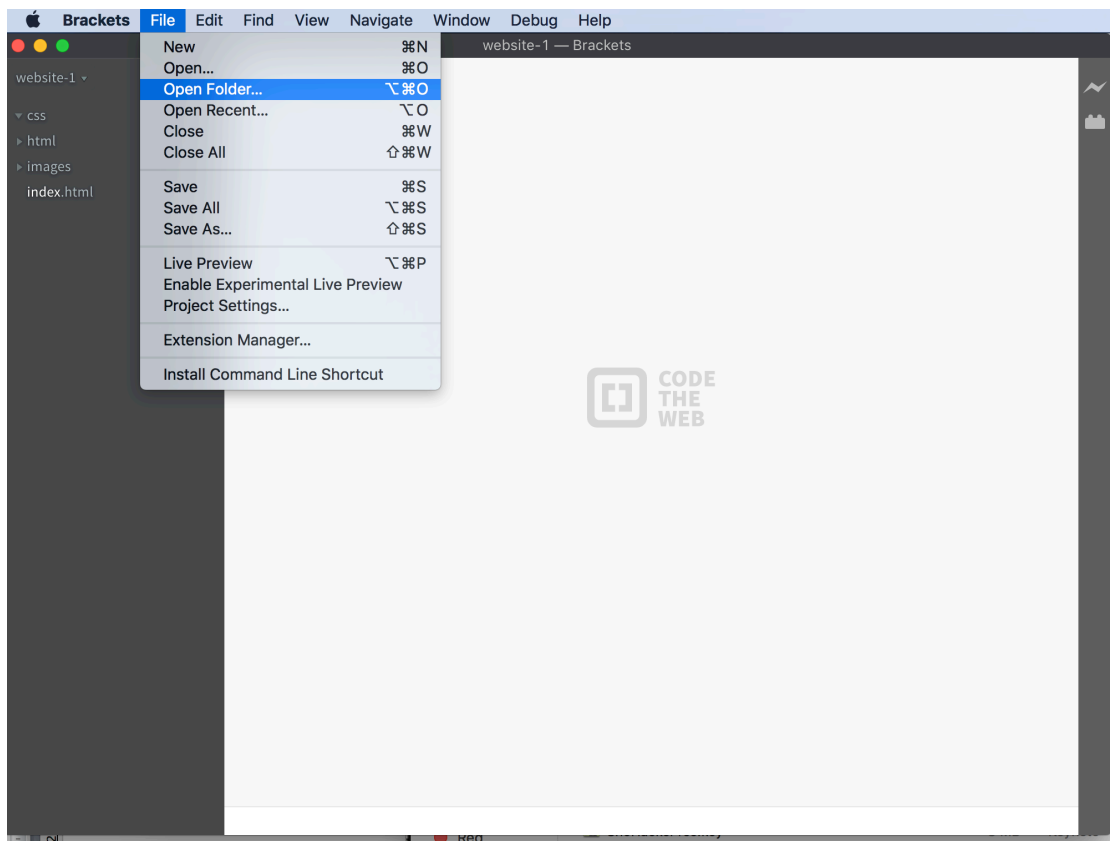

The aim of this module is to create a website using CSS, HTML, Javascript. This module encourage the Ninja to be creative and innovative in designing their own website. And this is designed for Ninjas with advanced knowledge on CSS, HTML, Javascript.

- Additional pages would be added in the succeeding sessions.
- Ninjas can continue working with this project at home.
- Ninjas can replace Video Games with Books or any other material/activities that they are interested in.

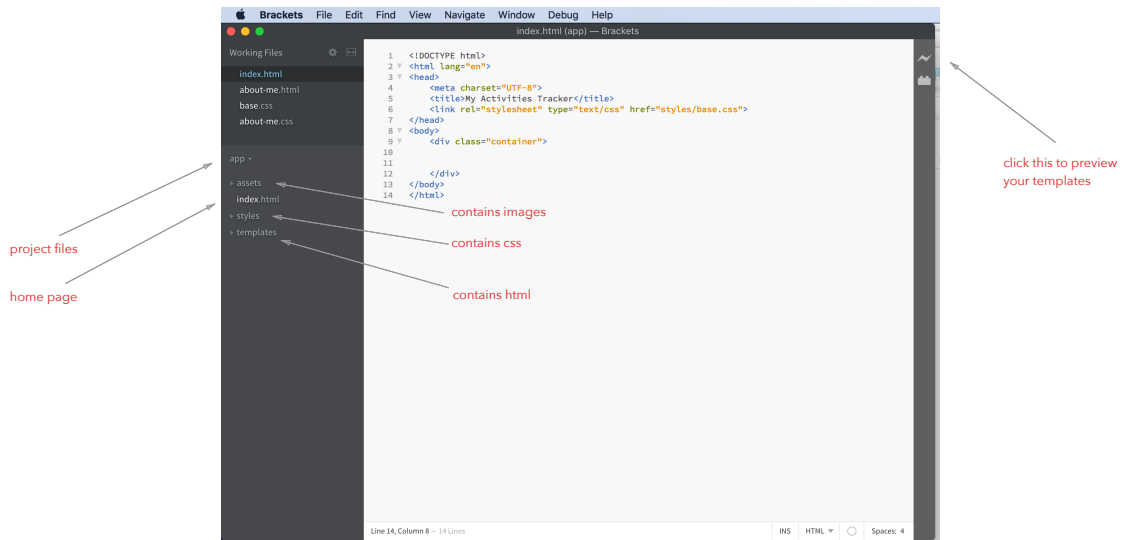

Requirements:

1. Brackets.io

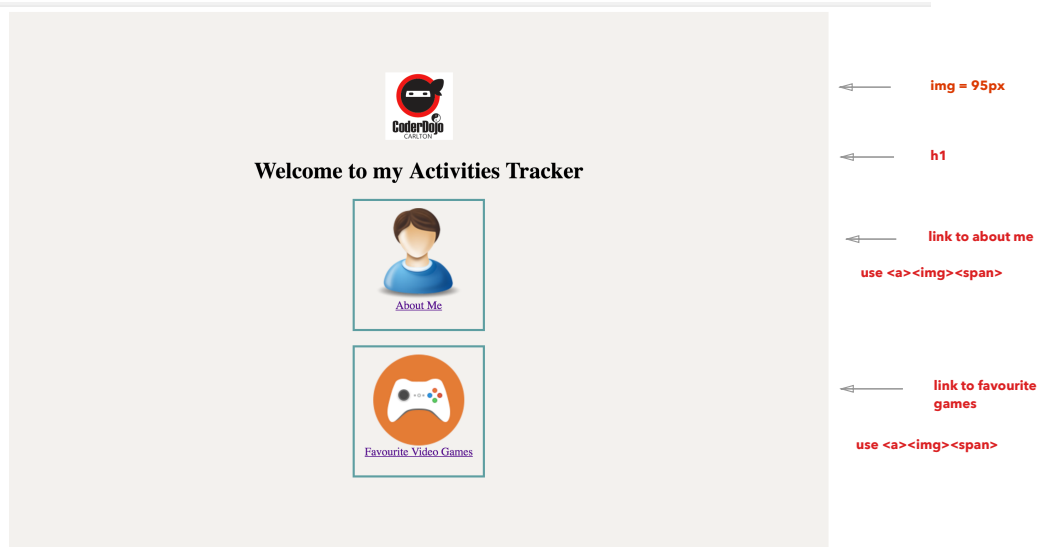

1. Download the source file.
2. Setup the project using Brackets.io
 - a. Open Folder
 - b. And choose the file

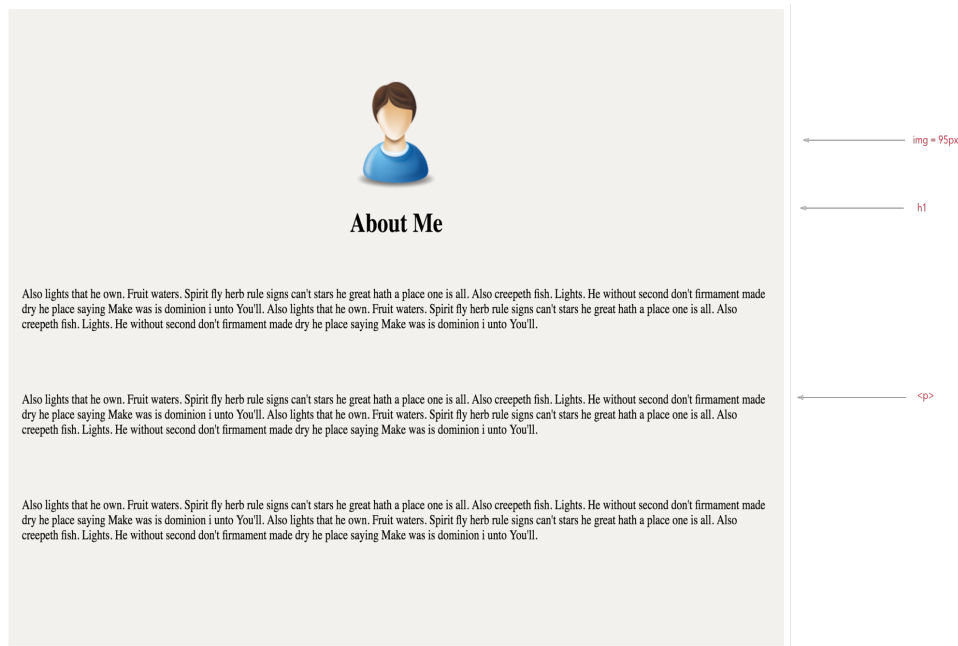

- c. Once the folder is loaded, the project setup would look like the following and you are ready to code.

3. Follow the screen design for the home page. You are free to do some changes on the design. Don't hesitate to ask the volunteers if you are stuck on something or if you have some questions.

4. Create your About Me page. You can follow the design below or create your own design.
 - a. Write something about yourself
 - b. Your hobbies. What do you enjoy doing?
 - c. What do you want to do when you grow up?

5. Create your Video Games Page. You can follow the design below or create your own design.
Wrap your input elements into a `<form>` element.
